

Habilitats informacionals

Gener 2013

Raquel Lorca

Presentació

- ✓ **Contingut de la sessió:**
 - 1. Estratègia de cerca**
 - 2. Bases de dades**
 - 1. Scopus**
 - 2. ISI (Web of Science)**
 - 3. Altres bases de dades**
 - 3. Sitkis**
 - 4. Internet: informació especialitzada**
 - 5. Gestor de referències**

1. Estratègia de cerca

1. Estratègia de cerca

Anomenem **estratègia de cerca** a la **pregunta** que fem a l'**eina** de recuperació d'informació per obtenir resultats. Per construir-la necessites els **termes de cerca** i **elements per relacionar-los**.

1. Estratègia de cerca

- **Definir el tema amb una frase**
- Cercar les **paraules clau** que el defineixen
- Cercar **sinònims i traduccions** de les paraules clau

*Aquestes normes són aplicables a
catàlegs, Internet, bases de dades, etc*

1. Estratègia de cerca

Exemple de cerca:

“Rendiment de la formació impartida a l'empresa”

| Català | Anglès |
|-----------|--|
| rendiment | return, returns, yield, yields |
| formació | in-company training, in-house training, in-plant training, internal training, on-site training, on-the-job training, training within industry |
| empresa | |

1. Estratègia de cerca

1. Relacions entre els termes

2. Execució de la cerca

1. Estratègia de cerca

1. Relacions entre els termes:

A. Operadors booleans → permeten combinar un o més termes a l'hora d'executar una cerca

AND

OR

NOT

B. Operadors de proximitat → especificen l'espai que hi ha entre els diferents termes que es cerquen

WITHIN

NEAR

C. Operadors de truncament → permeten recuperar paraules amb una arrel comuna

?

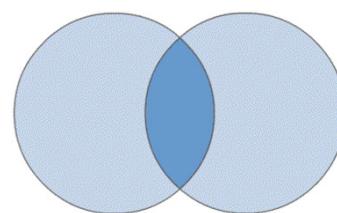

*

1. Estratègia de cerca

A. Operadors booleans

**Operador booleà
AND = &**

Recupera les referències que contenen
tots els termes que uneix

Exemple:

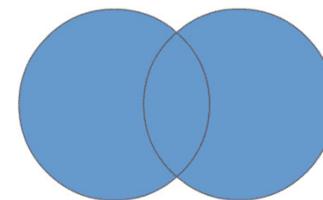

Rendiment de la formació a l'empresa
“return” AND “in company training”

1. Estratègia de cerca

A. Operadors booleans

Operador booleà
OR = /

Recupera les referències que contenen
algun dels termes que uneix

Exemple:

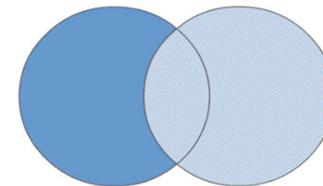

sinònims de “formació a l'empresa”
“in company training” OR “on site training”

1. Estratègia de cerca

A. Operadors booleans

Operador booleà
NOT = -

Recupera les referències que no contenen
el terme especificat

Exemple:

informació sobre formació a l'empresa,
però no *a les petites i mitjanes empreses*
“in company training” NOT “small and medium-sized firm”

B. Operadors de proximitat

1. Estratègia de cerca

Operador NEAR (N)

Troba les paraules si estan entre el número màxim de paraules que se li especifica. Escriurem les dues paraules i entre elles una N i el número màxim de paraules que vulguem entre elles:

training N3 company

Recuperarem articles com el següent:

Title: *Training for your company's future*

B. Operadors de proximitat

1. Estratègia de cerca

Cometes “ ”

Quan dos o més paraules estan entre cometes aquestes són cercades com una frase, exactament en el mateix ordre.

“In-company training”

Recuperarem articles com el següent:

Title: *In-company training solutions*

C. Operadors de truncament

1. Estratègia de cerca

Operador asterisc (*)

Serveix per truncar i recuperar paraules amb una arrel comuna. Se substitueix la part final de la paraula per un asterisc (*) i es recuperaran totes les formes de la paraula.

Exemple: financ*

I recuperarem:

finance
finances
financial
financier

1. Estratègia de cerca

2. Execució de la cerca:

Exemple:

- Frase: ***Rendiment de la formació impartida a l'empresa***
- Paraules clau: **rendiment, formació, empresa**
- El resultat:

((return* OR yield*) AND (“in company training” OR “in house training” OR “in plant training” OR “internal training” OR “on site training” OR “on the job training” OR “training within industry”) in TI) > 2000) and LA= english

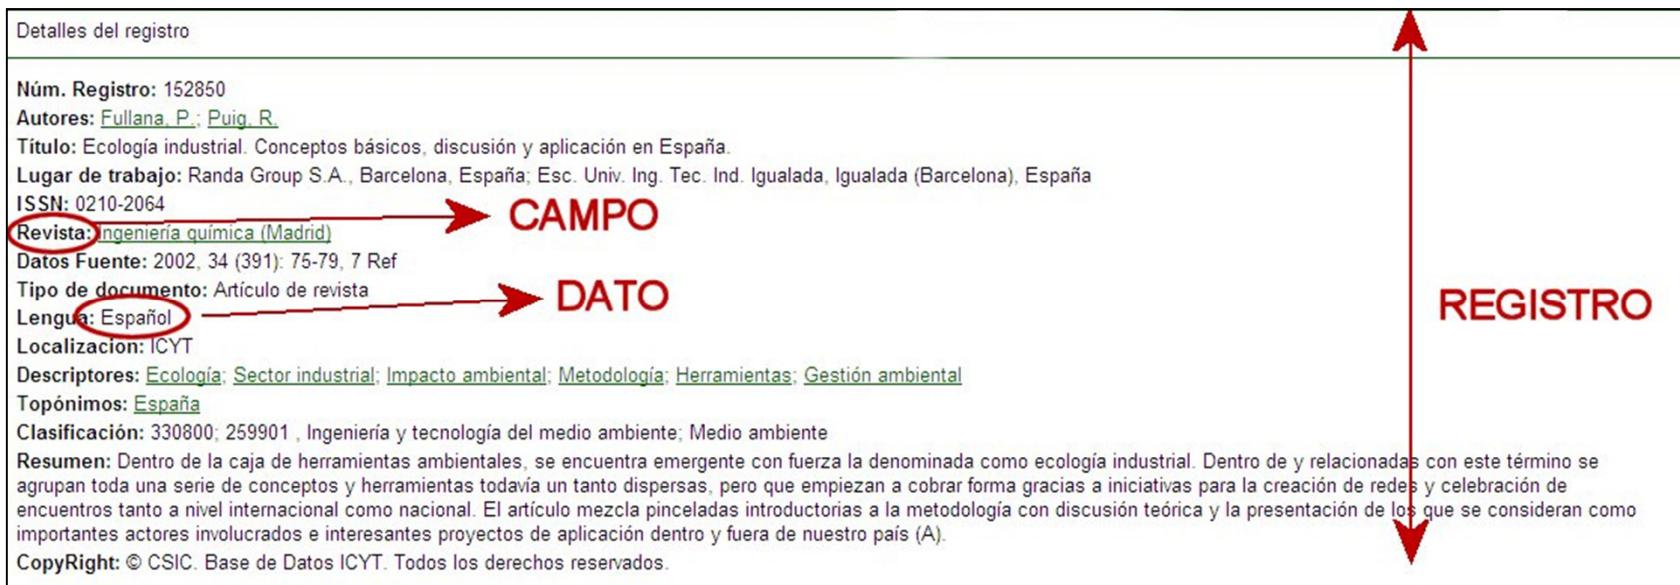

BRGF

2. Bases de dades

2. Què és una base de dades?

- ✓ Una base de dades és un conjunt d'informació, normalment especialitzada, organitzada i estructurada per a la seva posterior recuperació.

Pot incloure:

- ✓ Referències bibliogràfiques
 - o
 - ✓ Referències bibliogràfiques + resum
 - o
 - ✓ Referències bibliogràfiques + resum + text complet

2. Què és una base de dades?

2. Què és una base de dades?

- ✓ S'ha d'escol·lir la **base de dades** a consultar tenint en compte el tema, el tipus de document o la informació que es necessita
- ✓ Hi ha bases de dades de **molts tipus** però les més habituals contenen referències d'articles de revista, congressos o llibres de temàtica especialitzada
- ✓ Cada base de dades disposa d'una **interfície de cerca** diferent
- ✓ S'ha de consultar el **manual d'ajuda** de cada base de dades abans de fer la cerca
- ✓ Algunes ofereixen **serveis de valor afegit** com ara alertes, perfils personalitzats, etc...

BRGF

2.1. ELSEVIER: SCOPUS

2.1. Scopus

Què veurem sobre aquesta base de dades:

- Interfície de cerca
- Cerca bàsica
- Cites i alertes
- Refworks
- Text complet
- Autors
- Afiliació
- Revistes
- Índexs bibliomètrics

- Scopus (plataforma SciVerse)
- La base de dades multidisciplinar més amplia a nivell mundial en contingut de referències bibliogràfiques i citacions
- 4 àmbits:
 - ciències de la vida
 - ciències de la salut
 - ciències físiques
 - ciències socials i humanitats
- Editor: Elsevier
- URL: <http://www.scopus.com>

2.1. Scopus

- Conté:
 - 19.500 títols de revista
 - 400 publicacions d'empresa
 - 360 col·leccions de llibres
 - 5,3 milions de *papers* de congressos
- Total:
 - 28 milions de referències des de 1996 (el 78% inclouen citacions)
 - 21 milions de referències entre 1823-1996 (sense citacions)
 - 378 milions de pàgines web (Scirus)
 - 24,8 milions de patents
- Actualització diària

2.1. Scopus

2.1. Scopus

2.1. Scopus: interfície de cerca

The screenshot shows the Scopus search interface. At the top, there are navigation links: Hub, ScienceDirect, Scopus, Applications, Register, Login, Go to Scival Suite, and user registration/login information. Below the header is a menu bar with Search, Sources, Analytics, Alerts, My list, and Settings. A red circle highlights the "Document search" tab in the search menu.

The main search area has a "Search for:" field containing "logistics" and a dropdown menu set to "Article Title, Abstract, Keywords". A red arrow points from the "Search for:" field to the "Search tips" link. Another red circle highlights the "Limit to:" section, which includes Date Range (set to Published All years to Present), Document Type (set to ALL), and Subject Areas (checkboxes for Life Sciences, Physical Sciences, Health Sciences, Social Sciences & Humanities). A red circle also highlights the "Search history" section at the bottom of the search form.

To the right of the search form is a sidebar titled "Resources" containing links to add papers to ORCID, follow Scopus on Twitter, access training videos, learn about alerts and registration, see recent feature enhancements, and view known issues. A red circle highlights this sidebar. Below the sidebar is a section titled "Informació de la base de dades, novetats i manuals d'usuari".

2.1. Scopus: Refworks

The screenshot shows the Scopus Refworks interface. At the top, there are links for Hub, ScienceDirect, Scopus, SciTopics, and Applications. Below that is a navigation bar with links for Search, Sources, Analytics, My alerts, My list, and My settings. A Quick Search bar is followed by a 'Search' button. The main content area is titled 'Output: Export, Print, E-mail or Create a Bibliography'. It contains two numbered steps: 1. Select the desired output type for the selected document. 2. Export: Choose your preferences and click Export. Step 1 shows radio buttons for Export, Print, E-mail, and Bibliography. Step 2 shows a dropdown menu for 'Export format' set to 'RefWorks direct export'. A sub-menu for 'Output' is open, showing options: Citations only, Abstract format, Abstract format with References, Complete format, Specify fields to be Exported, and Citation information. The 'Citations only' option is highlighted with a blue selection bar. To the right of the interface, there is red text in Spanish: 'A banda de Refworks podem exportar altres formats' (Besides Refworks, we can export other formats), 'Podem escollir que dades exportem' (We can choose what data to export), and a list of exportable fields: Author(s), Document title, Year, Source Title, Volume, Issue, Pages, Citation count, and Source and Document Type.

Cerca básica:

Scopus: activitat II

- Selecciona la paraula més significativa del teu tema d'investigació i cerca a Scopus
 - Acota la cerca amb les opcions de: paraula clau, matèries, anys, idiomes, etc; fins aconseguir un conjunt de documents pertinent
 - Exporta les referències a Refworks; posa-les a una carpeta amb el nom “Scopus”
 - Cerca i descarrega el text complet d'algun dels articles recuperats a Scopus
 - Del mateix article crea una alerta de citació
 - Guarda la cerca que ha fet al teu compte d'Scopus i crea també una alerta
- (15 min.)

Record from Web of Science®

Training and performance in small firms

Author(s): Bryan, J (Bryan, Jane)

Source: INTERNATIONAL SMALL BUSINESS JOURNAL, 10.1177/0266242606069270 Published: DEC 2006

Times Cited: 6 (from Web of Science)

Cited References: 54 [view related records]

Els registres que ens interessin els seleccionem i s'han de reflexar aquí.

Abstract: This article explores the relationship between training and growth in small manufacturing businesses. Research on training undertaken at the macro-level highlights a series of earnings and productivity returns. However, firm-level research has generally yielded more ambiguous results. A review of small firms research indicates that the relationship between training and growth has rarely been considered within the wider context of other factors that may influence growth. Training literature also appears to be more concerned, perversely, with its impacts on firm inputs (employment growth) rather than output (sales) growth. Other considerations also complicate understanding of the relationship between training and performance, since training may be provoked by employment growth (but not theoretically by sales growth), and has a tendency to be associated with larger firms. These considerations are examined with respect to two types of training (in-house training and ex-house management training) using information from a sample of 114 small manufacturing firms in Wales.

2.2. Web of Science. Guardar cerques i crear alertes

The screenshot shows the Web of Knowledge interface. At the top, there's a navigation bar with links for Sign In, Marked List (0), My EndNote Web, My ResearcherID, My Citation Alerts, My Saved Searches, Log Out, and Help. Below this is a secondary navigation bar with tabs for All Databases, Select a Database, Web of Science (which is selected), and Additional Resources. Underneath are links for Search, Author Finder, Cited Reference Search, Advanced Search, and Search History. The main content area is titled "Web of Science SM" and "Search History". It displays a search result for query #1, which includes 10 results. The query details are: Topic=((return* OR yield*) AND ("in company training" OR "in house training")) Databases=SCI-EXPANDED, SSCI, A&HCI, CPCI-S, CPCI-SSH Timespan>All Years Lemmatization=On. Below the search results are buttons for Set, Results, Save History / Create Alert (circled in red), Open Saved History, Combine Sets, Delete Sets (with radio buttons for AND and OR, and buttons for Select All and Delete), and a "Combine" button. An arrow points from the "Save History / Create Alert" button to a callout box at the bottom. The callout box contains the following text:

- Per **executar les cerques** guardades al meu ordinador tornem a la pantalla de **Search History** i seleccionem el botó

2.2. Essential Science Indicators

- És una compilació global i exclusiva d'**estadístiques** sobre el desenvolupament científic. Inclou dades sobre les tendències de la ciència extretas de les bases de dades d'ISI.
- Recull les dades dels índexs de cites d'ISI i els classifica per: investigadors, institucions, països i publicacions.
- Abarca la darrera dècada de dades
- S'actualitza cada dos mesos

2.2. Essential Science Indicators

- Avaluva el **rendiment** d'un centre, d'un investigador, d'un país, etc.
- Troba *partners*: **investigadors** de primera línia a una disciplina
- Identifica tendencies significatives i àrees emergents

Pràctica V

1. Què científic ha sigut més citat a la categoria de *Economics & Business*? 
2. Qui té més citacions per article? (dels 20 primers)
3. Què article ha sigut més citat a Espanya en aquesta categoria?
4. A quin autor pertany el *Hot Papers* en *Economics & Business*? (el que ha rebut un major número de citacions)

2.2. Journal Citation Reports

- És la base de dades més utilitzada per **avaluar** publicacions científiques gràcies als seus índexs i a les seves dades estadístiques úniques.
- Conté les **revistes** més prestigioses internacionalment
 - una revista ha de complir molts requisits per a ser introduïda dins aquesta base de dades
 - ISI es molt selectiva amb els criteris d'acceptació d'una revista
- És útil per a investigadors, editors, documentalistes, consultors, gestors de centres d'investigació, etc.
- Oferta dades anuals del **Factor d'Impacte** de les revistes més citades. És un dels indicadors bibliomètrics més utilitzats
- Oferta l'**Índex d'immediatesa**

- Factor d'Impacte (Impact Factor= IF)**
- El factor d'impacte és la freqüència amb la que un article promig d'una revista ha sigut citat en un any concret.
- Es calcula dividint el número de citacions rebudes per una revista en un any determinat, pel número d'articles que aquesta mateixa revista va publicar durant els dos anys anteriors.
- Ens pot ser útil per...
 - ... identificar les millors revistes per publicar el nostre article
 - ... identificar les revistes més rellevants pel nostre treball d'investigació
 - ... revisar la repercussió d'una revista on hem publicat

- **Índex d'Inmediatesa (Immediacy Index)**

Rapidesa amb que es cita l'article dintre del mateix any que s'ha publicat. Es calcula dividint el número de citacions en articles publicats en un any concret, pel número d'articles publicats en aquell mateix any.

- **Vida mitjana de citacions rebudes (Cited Half-Life)**

Edat mitjana de les citacions rebudes per una revista. Aquesta xifra ajuda a avaluar l'antiguitat dels articles de la revista que han sigut citats.

- **Vida mitjana de citacions incloses (Citing Half-Life)**

Edat mitjana de les citacions fetes per una revista. Aquesta xifra ajuda a avaluar l'antiguitat dels articles citats d'una revista.

Pràctica VI

- Cerca les 10 revistes amb el Factor d'Impacte més alt de la teva especialitat
- Selecciona una, i compara el Factor d'Impacte de l'últim any amb el del 2007
- Torna a la consulta del 2011 de la revista escollida. ¿Quin és el número d'autocites i a que % equival del total?

2.3. ALTRES BASES DE DADES:

SCIENCE DIRECT
SABI

...

The screenshot shows the ScienceDirect search interface. At the top, there are links for SciVerse, Hub, ScienceDirect, Scopus, Applications, Register, Login, and Go to SciVal Suite. Below the header is a navigation bar with Home, Publications, Search, My settings, My alerts, and Shopping cart. The main search area has two sets of input fields: one for 'Articles' (Author, All fields) and one for 'Images' (Journal/Book title, Volume, Issue, Page). There are also 'Advanced search' and 'Search tips' buttons. Below the search bar is a large search button with a magnifying glass icon. Underneath, there are tabs for All Sources, Journals, Books, and Images, along with Advanced search and Expert search links. The main search form includes fields for 'Search' (in All Fields), 'Source' (All journals, checked for 'Include Articles in Press'), 'Subject' (with a dropdown menu for All Sciences, Agricultural and Biological Sciences, Arts and Humanities, and Biochemistry, Genetics and Molecular Biology), 'Limit by document type' (checkboxes for Article, Review Article, Short Survey, Short Communication, Correspondence, Letter, Discussion, Book Review, Product Review, Editorial, Publisher's Note, Erratum), 'Date Range' (radio buttons for All Years, 2003 to Present), and 'Volume', 'Issue', and 'Page' input fields.

2.3. Altres bases de dades : ScienceDirect

Descripció: Plataforma de consulta de revistes electròniques a text complet d'àmbit multidisciplinar. Permet la creació d'alertes de cerca i subscripcions a sumaris.

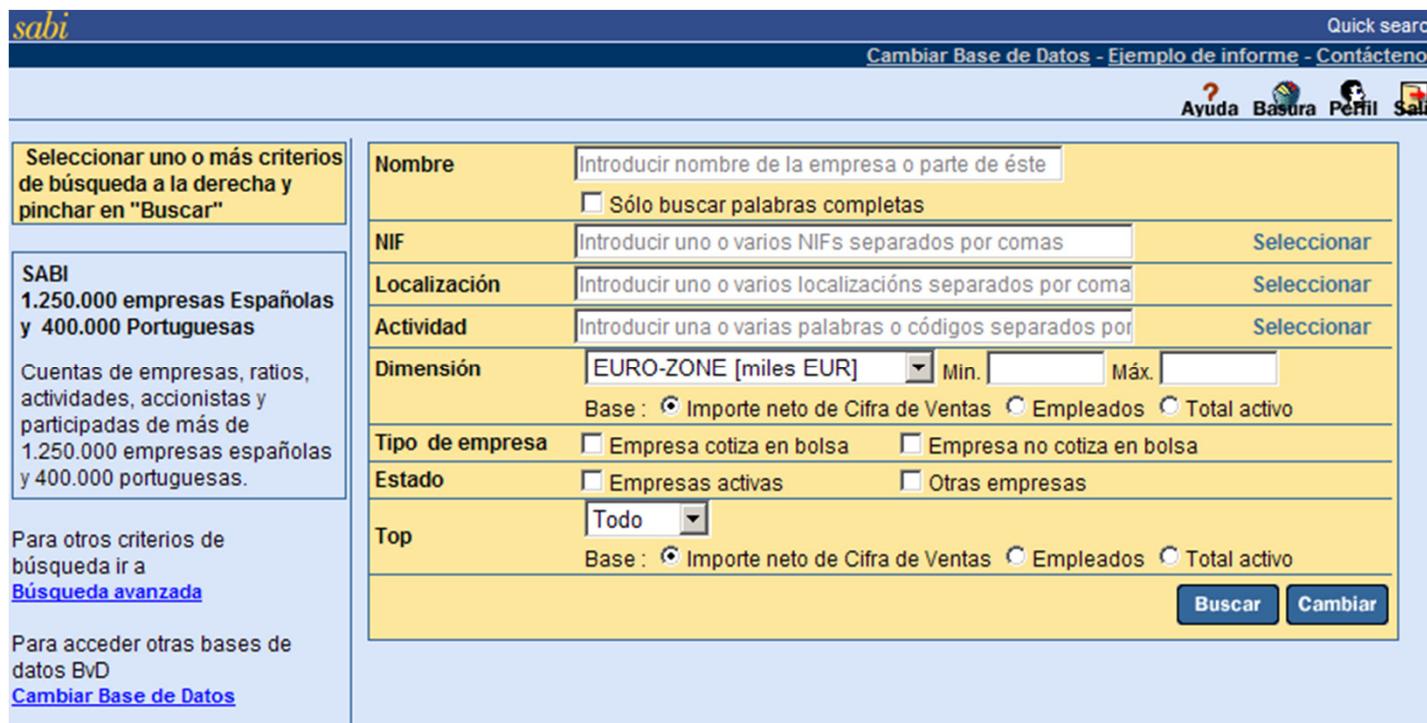

Cobertura: Text complet des del 1995.

Editor: Elsevier

Guia del recurs: <http://bibliotecnica.upc.edu/content/scencedirect>

2.3. Altres bases de dades: SABI

- Descripció:** Base de dades amb informació financerà d'empreses espanyoles i portugueses. Inclou memòries d'activitat i comptes anuals, ratios, evolució financerà de l'empresa a través del temps, etc. Inclou un software d'anàlisi financerà que permet fer informes, comparar grups d'empreses, etc.
- Editor:** Bureau van Dijk
- Guia del recurs:** http://bibliotecnica.upc.edu/sites/bibliotecnica.upc.edu/files/arxius_site/file/coleccions/Manual%20Sabi.pdf

The screenshot shows the SABI search interface. On the left, there's a sidebar with instructions to select search criteria and a summary of the database: "SABI 1.250.000 empresas Españolas y 400.000 Portuguesas". Below that are links for advanced search and switching databases. The main area contains search fields for Name, NIF, Location, Activity, Dimension (with dropdown for currency and range), Type of company (checkboxes for listed vs. unlisted and employees vs. total assets), State (checkboxes for active vs. others), and Top results (dropdown for scope and checkboxes for base metrics). Buttons for "Buscar" (Search) and "Cambiar" (Change) are at the bottom right.

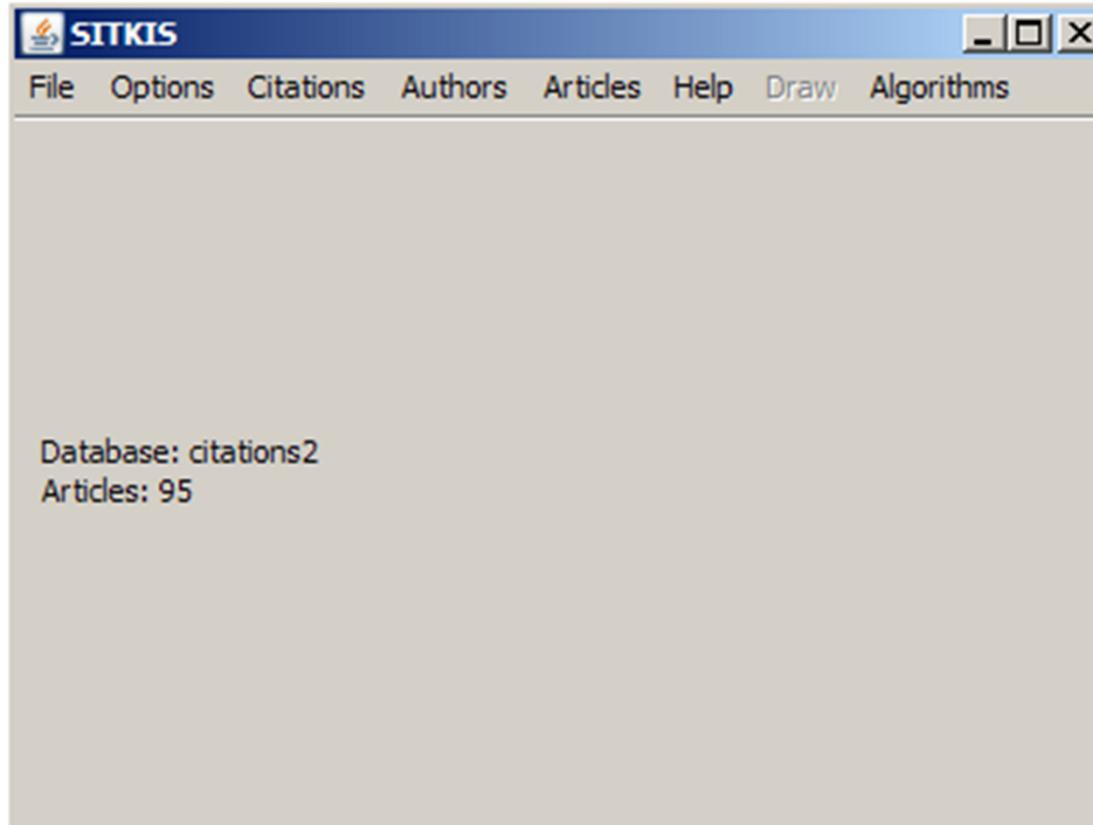

BRGF

3. Sitkis

3. Sitkis

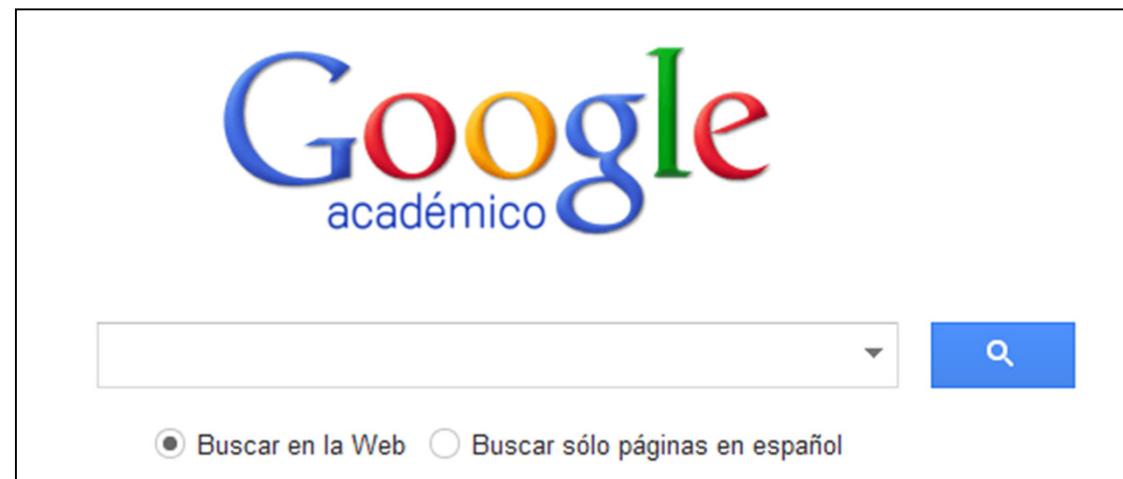

- És una **eina d'anàlisi**, desenvolupada sobre Java, exclusiva per efectuar anàlisis bibliomètrics racionalitzats. La **sortida de dades** és mitjançant **Excel** per al seu anàlisi posterior amb NEtdraw.

4. Internet: informació especialitzada

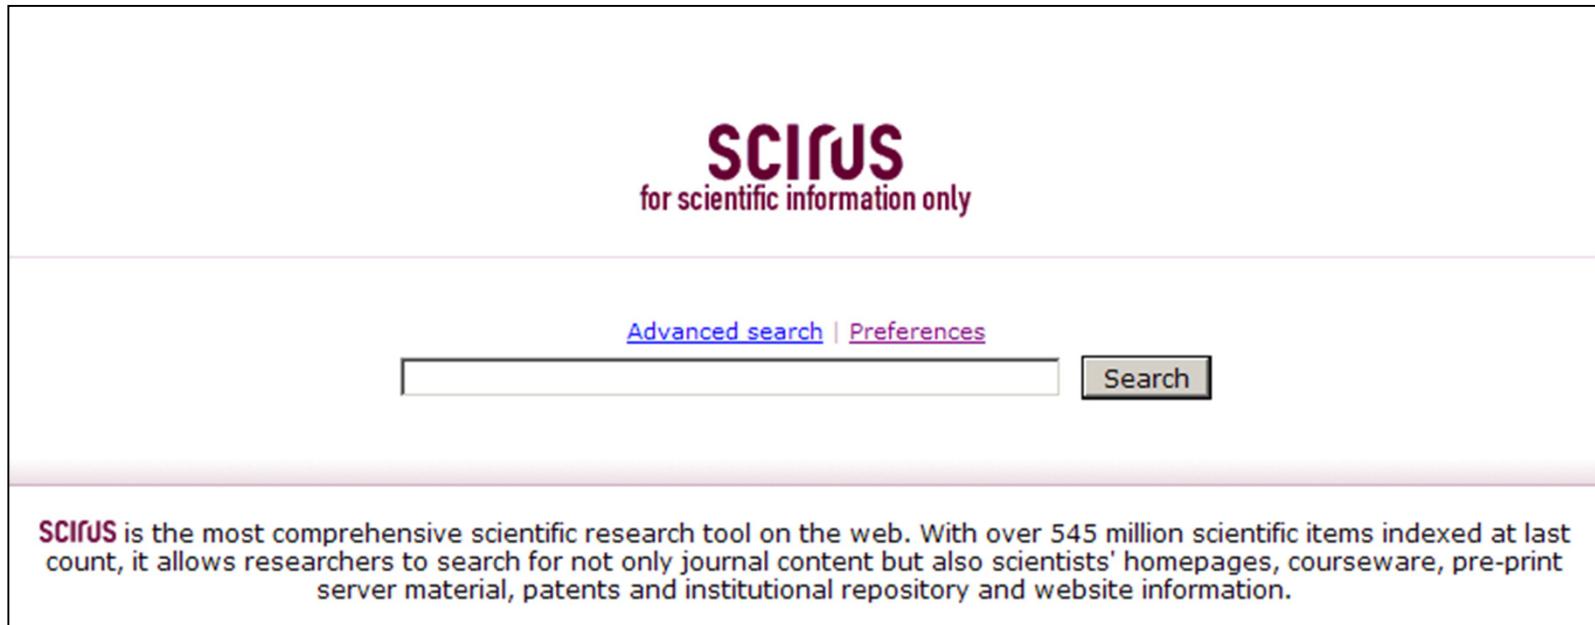

<http://www.scirus.com/>

<http://scholar.google.es/>

4.1. Scirus

(Elsevier, 2001)

The screenshot shows the Scirus search interface. At the top center is the Scirus logo: "SCIRUS" in large, bold, white letters, with "for scientific information only" in smaller white text below it. Below the logo is a horizontal navigation bar with links for "Advanced search" and "Preferences". Underneath the navigation bar is a search input field with a "Search" button to its right. A pink horizontal bar spans the width of the page just below the navigation bar. At the bottom of the page, there is descriptive text about Scirus.

SCIRUS
for scientific information only

[Advanced search](#) | [Preferences](#)

SCIRUS is the most comprehensive scientific research tool on the web. With over 545 million scientific items indexed at last count, it allows researchers to search for not only journal content but also scientists' homepages, courseware, pre-print server material, patents and institutional repository and website information.

<http://www.scirus.com/>

4.1. Scirus

(Elsevier, 2001)

Scirus returns results from the whole Web, including access-controlled sites that other search engines don't index. Scirus currently covers over 545 million science-related Web pages, including:

- 188 million .edu sites
- 53 million .org sites
- 32 million .ac.uk sites
- 50 million .com sites
- 46 million .gov sites
- Over 176 million other relevant STM and University sites from around the world

In addition to Web pages, Scirus indexes the following special sources (the numbers are approximate):

- 498,000 articles from [American Physical Society](#)
- 793,000 e-prints from [ArXiv.org](#)
- 102,000 full-text articles from [BioMed Central](#)
- 676,000 articles from [BMJ Group](#)
- 46,500 documents from [Caltech Coda](#)
- 3,500 e-prints from [Cogprints](#)
- 108,000 full-text articles from [Crystallography Journals Online](#)
- 85,500 documents from [CURATOR](#)
- 303,000 full text documents from [United States Department of Energy](#)
- 6.0 million documents from [Digital Archives](#)
- 96,000 documents from [DiVa](#)
- 117,000 full-text articles from [Project Euclid](#)
- 61,000 full-text articles from [Hindawi Publishing Corporation](#)
- 7,100 full-text documents from [HKUST Institutional Repository](#)
- 90,800 full-text documents from [The University of Hong Kong](#)
- 40,600 full-text documents available from [IISc](#)
- 25,000 full-text documents available from [Humboldt Universität](#)
- 387,000 full-text articles from [IOP Publishing](#)
- 25.2 million patent records from [LexisNexis](#)

¿Qué es Google Académico?

Google Académico te permite buscar bibliografía especializada de una manera sencilla. Desde un solo sitio podrás realizar búsquedas en un gran número disciplinas y fuentes como, por ejemplo, estudios revisados por especialistas, tesis, libros, resúmenes y artículos de fuentes como editoriales académicas, sociedades profesionales, depósitos de impresiones preliminares, universidades y otras organizaciones académicas. Google Académico te ayuda a encontrar el material más relevante dentro del mundo de la investigación académica.
